NMWC

Customer Master — Field App

Salesman User Guide

FOR SALESMEN

NMWC Customer Master · v1.0 · 2026-05

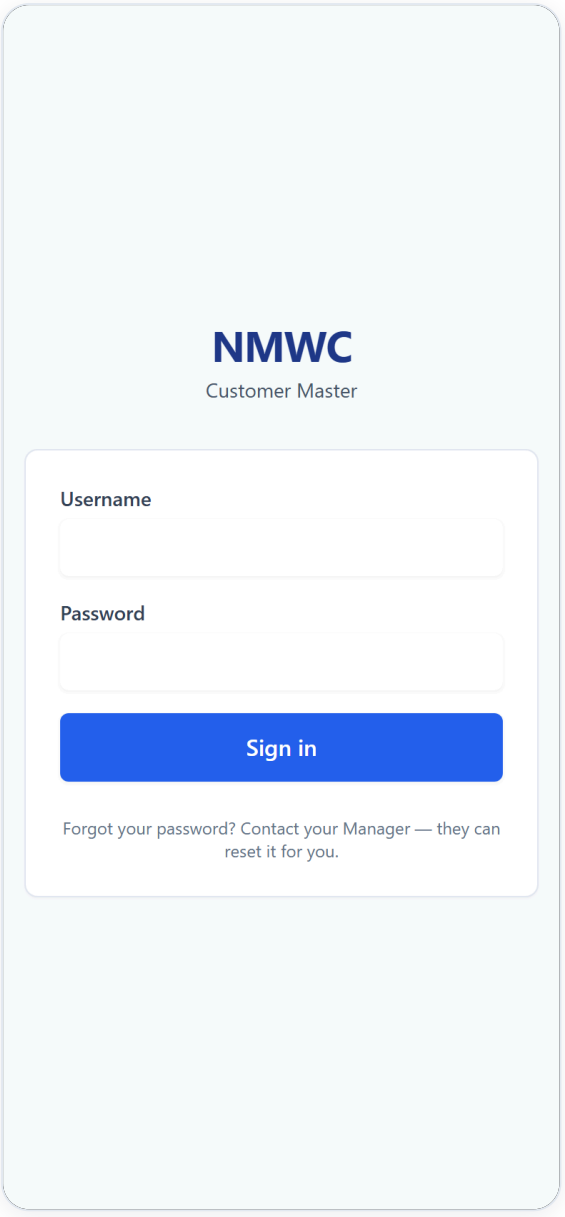

Welcome

This is your daily companion. The NMWC Customer Master app helps you keep every shop on your route up-to-date — directly from the field. This guide walks you through every action you will need: logging in, finding a shop, fixing missing info, taking photos, capturing GPS, submitting for approval, and handling shop closures or reopenings.

1. Logging in

You only do this the first time, then once a day or week.

1. On your phone, open **https://nmwc-cm.vercel.app**. Save it as a bookmark on your home screen.

2. Type your **Username**. Your manager gives you this on day one.

3. Type your **Password**. Tap the blue **Sign in** button.

4 First time? The app may ask you to set a new password. This is for your safety — pick something only you know.

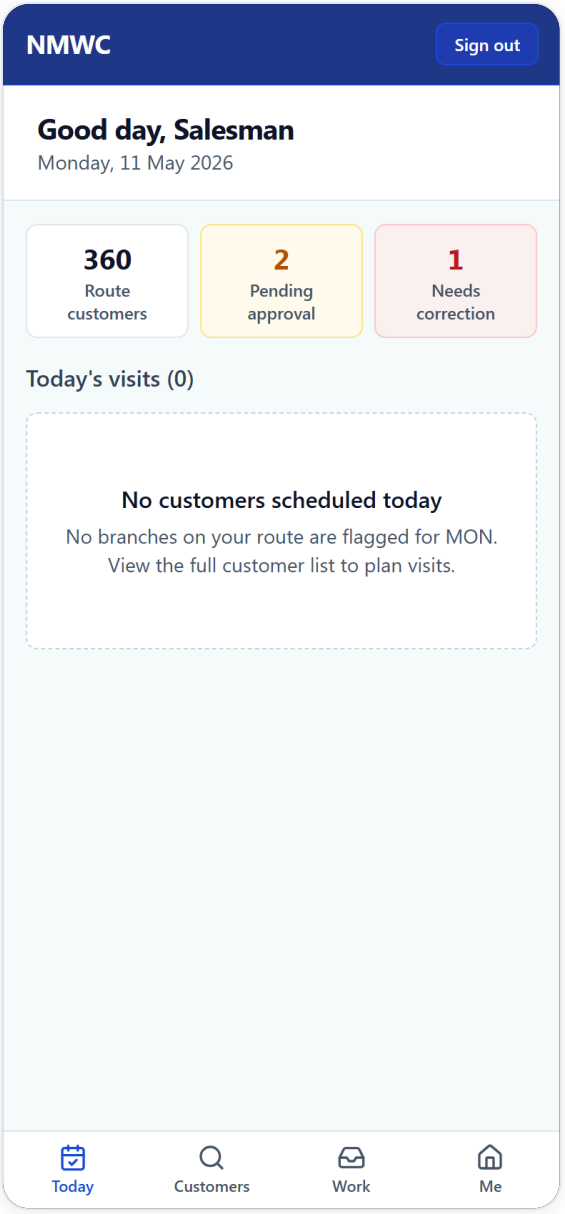

FORGOT YOUR PASSWORD?

Don't guess more than 5 times — the system will lock you out for one minute. Just message your manager — they reset it in 30 seconds.

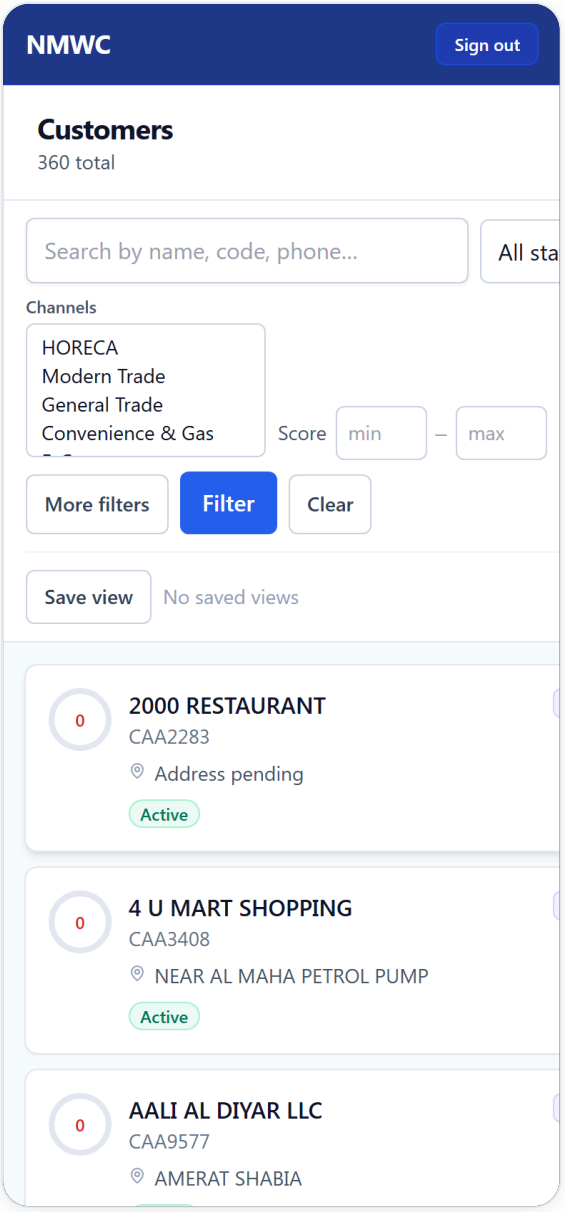

2. Find the shop you are visiting

Open the customer in two taps.

1. Tap **Today** in the menu. You see the shops on your route scheduled today.

2 If the shop is not on today's list, tap **Customers** and search by name, NMWC code or Temix code (the shop's page shows its Temix code too).

3 Tap any row to open that shop's profile.

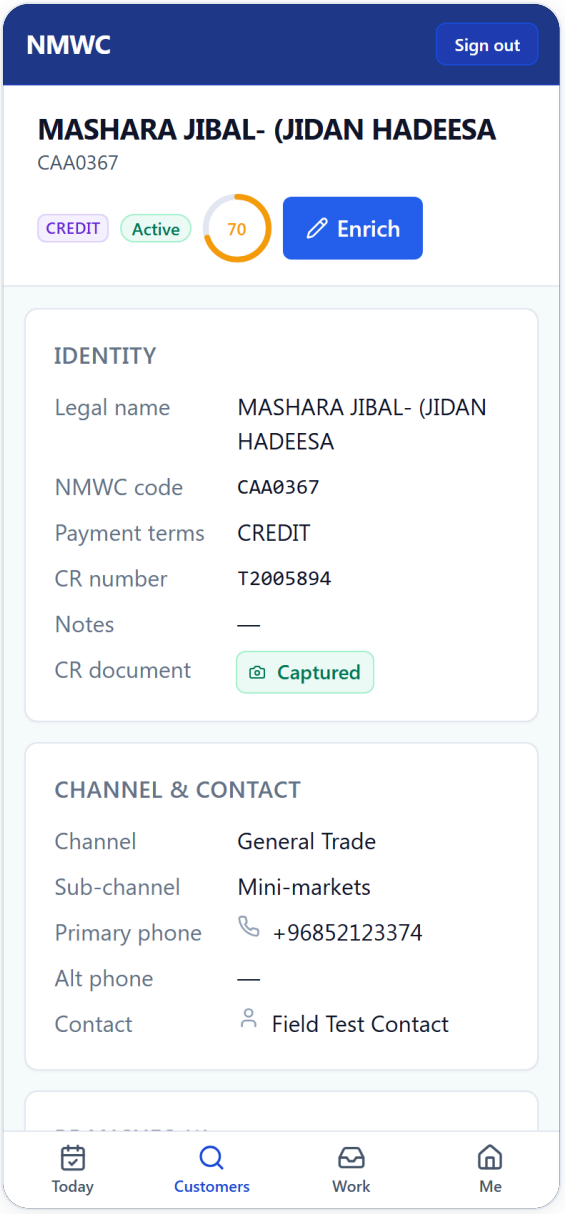

WHAT'S A "BRANCH"?

A "customer" is the legal entity (company name on the CR). A "branch" is the physical shop you visit. Most shops have one branch ("Main"). Big chains have several.

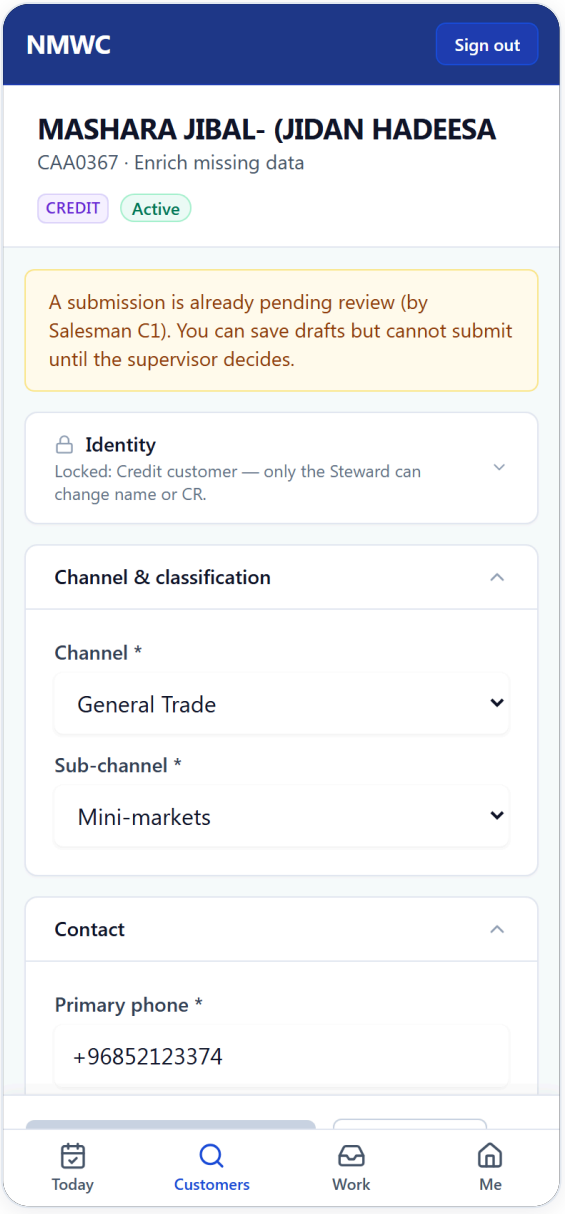

3. Update the shop info

Fill in what is missing. Required fields are marked with *.

1 On the customer profile, tap the blue **Enrich** button at the top right.

2 **Identity** section: legal name, NMWC code, CR number, channel, sub-channel, contact person, primary phone.

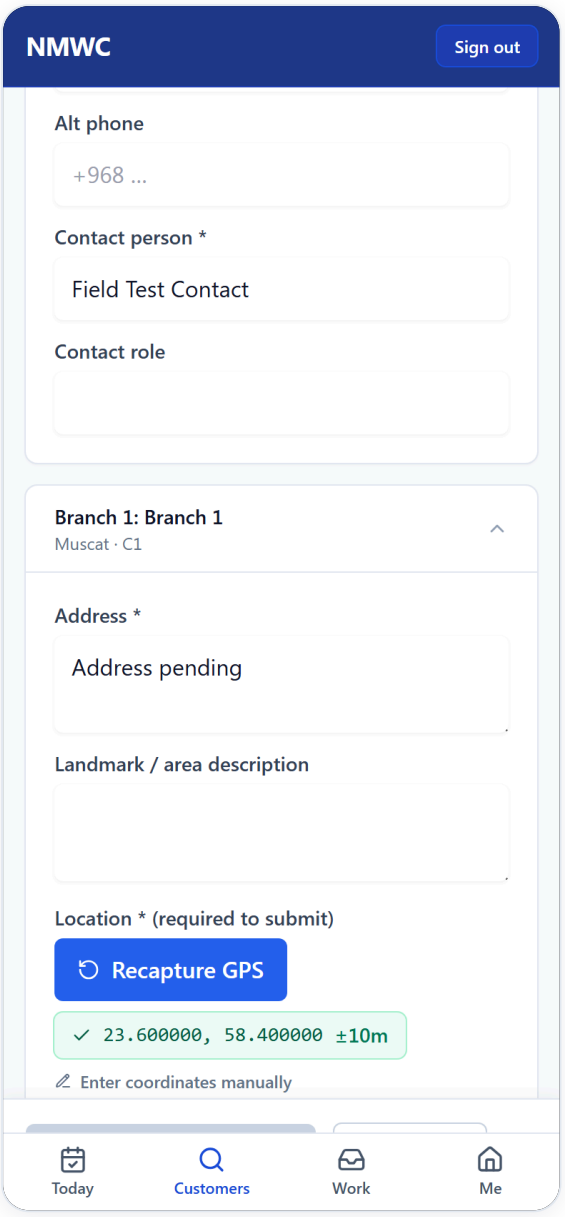

3 Phone must be a valid Oman number, e.g. **+96891234567**.

4 Channel says what type of shop it is — pick the closest match (General Trade, HORECA, Modern Trade, etc.).

4. Take the photos

Always take fresh photos at the shop today. Old gallery photos are rejected. The shop-front photo is required to submit; the others raise the completeness score.

1. Tap an empty photo slot. Your camera opens.

2. **Shop front** (required) — clearly shows the entrance. For a home-delivery customer, the building entrance.

3. **Signboard** — the shop's sign with its name, when the shop has one.

4. **CR document** — the legal commercial registration paper, when the customer is a registered business.

5. The app uploads automatically. If your network is weak, it retries on its own. If still failing, tap **Retry upload** — your photo is saved, no need to retake.

TAKE PHOTOS AT THE SHOP, NOT FROM THE GALLERY

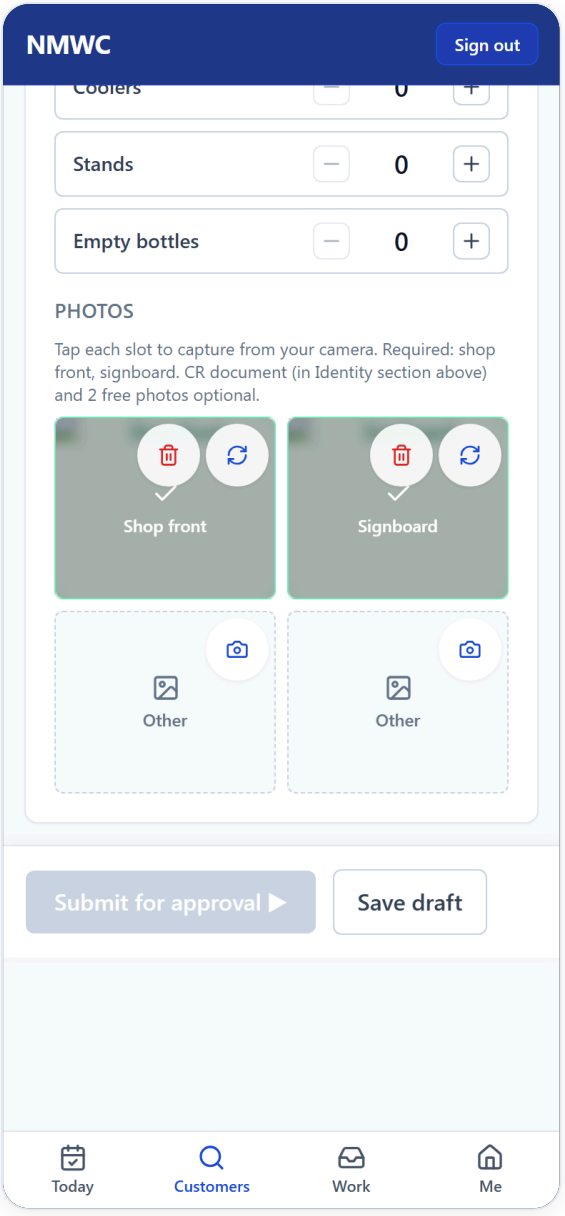

Photos older than 24 hours are rejected. Supervisors can see when each photo was taken. Taking it on the spot is the only way.

5. Capture the GPS location

1. Tap the **Capture GPS** button when you're standing at the shop entrance.
2. Your phone asks permission — tap **Allow**.
3. If GPS doesn't work (indoors, weak signal), tap **Enter coordinates manually**. Tap the map at the shop's location, or type the lat/lng. Add a short reason so the supervisor sees it's manual.

6. Submit for approval

1. Scroll to the bottom — you see a sticky bar with two buttons.

2. Tap the blue **Submit for approval** button (left).

3. You'll see a confirmation. The shop's status becomes **Pending review** until your supervisor decides.

4 If you're interrupted, tap **Save draft** instead — it stays on your phone for 7 days.

7. Mark a shop as permanently closed

Use this only if the shop has truly shut down (gone out of business, moved, etc.).

1. On the customer profile, tap the red **Mark closed** button on the branch tile.
2. Take a fresh photo showing it's clearly closed (shutters down, sign removed, empty).
3. Type a short reason — at least 5 letters. e.g. "Shop has shut down, signage removed."
4. Tap **Submit closure**. Your supervisor reviews it.

BE SURE BEFORE YOU MARK IT

A blurry photo or one taken from far away will be rejected. Show the closed entrance clearly.

8. Request reactivation of a closed shop

Use this when a previously closed shop has reopened.

1. Open the closed shop's profile. The branch shows a **Closed** tag.
2. Tap the green **Request reactivation** button.
3. Take a fresh photo showing the shop is open and operating today.
4. Type a reason and submit. The **manager** (not your supervisor) approves reactivations.

WHY A FRESH PHOTO?

The system checks the photo was taken AFTER the shop was marked closed. This prevents anyone from using an old photo to fake a reopening.

9. Common situations

Situation	What to do
Photo upload keeps failing	Move outside or near a window. Wait a few seconds. The app retries automatically. If still stuck, tap "Retry upload" — your photo is saved.
GPS won't capture	Tap "Enter coordinates manually" inside the GPS box. Tap the map or type the numbers. Add a short reason.
"This customer is not on your route"	You can only enrich shops on your assigned route. Ask your manager to reassign it if needed.
My submission was rejected	Read the supervisor's reason. The shop appears in your "Needs correction" list. Open it, fix what they asked, and re-submit.
I'm mid-form and need to leave	Tap "Save draft". You can come back within 7 days and finish.
The signal dropped while I was submitting	The app says, beside the button, whether your submit arrived. Stay on the page and tap "Try again" when you have signal. If it had already arrived you see "Already received" — it is never sent twice.

10. A new customer on credit terms

Since 11 October 2026 a credit customer needs more documents, and one more errand from you: the customer's signed credit application. A cash customer is unchanged.

1. Tap **New customer** in the menu and choose **Credit** payment terms. Fill in the customer and the shop as for a cash customer.

2. Type the customer's **E-mail**. It is required for a credit customer.

3. Under **Credit application**, type the requested credit limit (OMR) and payment term (days). The Finance Manager and the GM approve or reject these figures; they cannot change them.

4. Under **Credit documents**, take a clear photo of every page of the owner's ID card, the membership certificate, the VAT registration certificate and the tax card (up to 4 pages each). All four are required, with the CR copy. No guarantee document is asked for.

5. Submit. The request goes to your supervisor (in NMWC, your manager), then to the Sales Director.

6. When the Sales Director approves, you get a red alert, **Signed credit application needed**, with the time it is due: **3 working days**. Your supervisor or manager prints the credit application for you.

7. Take the printed application to the customer. The customer writes the name and designation, signs, and stamps it with the company stamp.

8. Open the alert, or the request under **Work items**. Take a clear photo of each page up to and including the page with the signature and stamp (at most 6). Leave out the **Photos & documents** pages after it: the CRM already has them. Tap **Send signed application**.

9 The request goes on to the Finance Manager, the GM and the Accountant. The customer is created when the Accountant approves.

LATE AFTER 3 WORKING DAYS

If the signed application is not uploaded in time, you and your managers are told, and later the GM and the Sales Director.

SENT BACK BY THE FINANCE MANAGER

The request comes back to you at the same step, with the reason. Keep the pages that are right, retake the others, and tap **Send signed application** again.

THE CUSTOMER WILL NOT SIGN

Open the request and tap **Withdraw this request** at the bottom of the page. It is closed for good, and the CR number and the shop are free again.

11. Quick reference card

Keep this page handy in your first weeks.

Buttons you'll use

Enrich (blue, top-right)	Open the form to update the shop.
Save draft	Save your work without sending. Stays 7 days.
Submit for approval	Send your changes to your supervisor.
Mark closed (red)	Tell the system this shop has permanently closed.
Request reactivation (green)	A closed shop has reopened — send to manager.
Retry upload	Re-send a failed photo without retaking it.
Sign out	End your session. Always sign out on shared devices.

Status tags you'll see

Active (green)	Shop is operating normally.
Closed (red)	Shop has shut down. No active orders.
Pending review	You submitted, supervisor hasn't decided yet.
Approved	Your last submission was approved — change is live.
Needs correction	Supervisor sent it back. Open and fix.

Who to contact

Forgot password / locked out	Your manager — they reset in 30 seconds.
Photo or GPS not working	Try the manual fallback. Then your supervisor.
Wrong info in the master	Submit an enrichment with the correction.
